Claim 10 (canceled)

Claim 11 (canceled)

Claim 12 (canceled)

Claim 13 (canceled)

14. (currently amended) An isolated pluripotent embryonic-like stem cell, derived from non-embryonic or postnatal animal cells or tissue, capable of self-renewal, which differentiates and ~~capable of differentiation~~ to cells derived from all of the ~~of each and any of~~ endodermal, ectodermal and mesodermal lineages and which does not give rise to functional gametes, genetically engineered to express a gene or protein of interest.

15. (currently amended) A method of producing a genetically engineered pluripotent embryonic-like stem cell comprising the steps of:

(a) transfecting pluripotent embryonic-like stem cells, derived from non-embryonic or postnatal animal cells or tissue, capable of self-renewal, which differentiate and ~~capable of differentiation~~ to cells derived from all of the ~~of each and any of~~ endodermal, ectodermal and mesodermal lineages and which do not give rise to functional gametes, with a DNA construct comprising at least one of a marker gene or a gene of interest;

(b) selecting for expression of the marker gene or gene of interest in the pluripotent

embryonic-like stem cells;

(c) culturing the stem cells selected in (b).

16. (original) A genetically engineered pluripotent embryonic-like stem cell produced by the method of claim 15.

17. (original) The stem cell of claim 16 which is a human cell.
